SUMMARY

Silicon Firmware Development Engineer with 3 year experience in firmware development specialized in C++ programming language.

EDUCATION BACHELOR

Bachelor of Information technology - Web dev specialization

Graduating February 2024

Polish Japanese Academy of Information Technology
Gdańsk

Relevant coursework: Object programming, micro controllers, data structures and algorithms, problem-solving aptitude, familiarity with distributed file systems and network protocols

EDUCATION MASTERS

Master in Rocket Science - Satellite Technology

Graduating September 2025

Gdańsk University of Technology
Gdańsk

Relevant coursework: English mastering (travel aboard), Telecommunication, Micro controller firmware

TECHNICAL SKILLS

Programming Languages: C++, Python, Ruby, JS, Java

Enviroments: Linux, Windows, Arduino

Testing Frameworks: CppUtest, GoogleTest

Fammiliar concepts: TDD, OOP, Singleton

PROFESSIONAL EXPERIENCE

Intel, Gdańsk: Silicon Firmware Development Engineer

October 2023 – Current

- Developed and implemented communication protocols such as I2C, SPI, and UART in embedded systems, ensuring seamless integration and robust performance for hardware-software communication.
- Designed and debugged firmware solutions for multi-socket server platforms, adhering to ACPI standards to optimize power management and hardware abstraction.
- Collaborated with cross-functional teams using Git and GitHub for version control, implementing efficient workflows and maintaining high-quality code repositories.
- Demonstrated strong communication skills by actively participating in design reviews, technical discussions, and documentation of development processes.

WSB MERITO Univercity, Gdańsk: Lecturer Object Oriented Programming C++

March 2026 – Current

- Deliver in-person lectures in higher education programs.
- Prepare and present course materials aligned with academic standards.
- Engage and support students in developing subject knowledge and practical skills.
- Review and correct code

ACADEMIC PROJECTS

Odysey of the mind

Fall 2020 – Summer 2021

Problem-solving competition where each team have to use their imaginations to solve complex problems. For us was creating a Car capable of transporting 1 person. We used our knowledge in C++ and Embedded programming to win 1st place in Poland and 4th in the world.

ACTIVITIES

Mentorship Program

Aug 2024 – 2025

Serving as a Mentor at NTD Ukraine

- Providing guidance and support to the next generation of IT professionals, fostering their growth and development in the field.
